Profile

I am coming from teaching background where collaboration, attention to details and communication skills are core part of day-to-day job. As a frontend developer I feel obligated to clearly understand users needs and turn them into working software. I am happy to be working with technologies to make even bigger impact to your business. I am seeking for an opportunity to be working with you and use all my skills to be bring value.

Technical Skills

JavaScript (ES6+), jQuery, SASS, HTML5, CSS3, JSON, Bootstrap, React, Redux, REST APIs Tailwindcss, jQuery, Context API, mongo DB, Nodejs, Express, mongoose, WordPress, Elementor plugin, Git & GitHub

Design Tools

, Figma, Illustrator, Adobe XD

Projects

Dar es Salaam Independent School Website | [website link](#)

- Collaborated with the school principal, quality manager and teachers in the design process.
- Developed a user-friendly architecture and provide support.
- I deployed the website and in return it has increased the number of students applications by 40+ from primary to secondary each year.
- I used WordPress, and Elementor plugin for development and Figma for UI design

Recipe app | [website link](#) | [source code](#)

- Web app that helps user to learn how to cook by following ingredients instructions
- It uses Spoonacular.com/food-api to fetch resources and render them as per design
- I used ReactJs, JavaScript, html5, css3, fetch API

Kibogoji Experiential Learning Inc | [website link](#)

September 2021

- I collaborated with the school owner in the design process and implement the new school website from start to finish.
- I developed a user-friendly architecture and provide support.
- I added the analytics tool to monitor new site visit which raised from 0 to 50 visits per month, which helped school to receive more donation to support underprivileged students.
- I used JavaScript, Bootstrap, HTML5, CSS3, Google Analytics.

Startup Landing page (softfy Inc) | [website link](#)

- I developed a user-friendly responsive startup landing page for a fiction startup company with focus on educational technologies offering digital solutions and services to educational institutes.
- The project is open source, where anyone is free to copy the code or use for his or her personal project
- Built with JavaScript, Tailwindcss, HTML5, hosted in netlify.com

Work experience

Year 10 to 13 IT Tutor

Dar es Salaam Independent School (Cambridge International School)
2017 to 2021.

- Planned and prepared hands-on learning activities according to children's educational needs.
- Assessed, recorded and reported on the development, progress and attainment of students by ongoing observations
- Communicated and consulted with parents on student's learning and progress.
- Achieved remarkable performance in the candidate class's final examinations.
- Trained and supported new teachers with the use of technology facilities and train them how to incorporate technology in teaching.
- I started and supervised the Coding Club to train students with a strong passion for technology, skills such as web development using HTML, CSS and JavaScript and web design skills.
- Created and trained teacher to monitor and manage the current school website using CMS (WordPress).
